EDUCATION

University of Washington

Sept 2025 – Jun 2027

Master of Science in Human
Centered Design & Engineering

Tsinghua University

Sept 2020 – Jun 2025

Bachelor of Engineering in
Architecture

GPA: 3.84/4.00 | Top 10% |

Tsinghua Overall Scholarship

SKILLS

UX Design & Visual Design

Interaction Design, Prototyping,
Responsive Design & Methods,
User Research (Interview, Usability
Testing), A/B Testing, Data
Analysis, User Journey, Information
Architecture, Product Design,
Typography, Color, Visual Identity,
Motion Design

AI Product Design & LLMs

Generative AI (Stable Diffusion,
Midjourney, ComfyUI, Runway), AI
Agent & Automation, Machine
Learning, Vibe Coding (Lovable,
Bolt.ai, Cursor, Figma Make, Claude
Code)

Tools & Platforms

Design: Figma (components,
variants, design systems, API),
Framer, Adobe Suite, Rhino,
Blender
Development & QA: HTML, CSS,
Python, JavaScript, R, Arduino,
Playwright
Collaboration: GitHub, Notion
Motion & Video: Remotion

WORKING EXPERIENCE

IDEA Enterprises | UX/Product Designer Intern

AI-powered B2B SaaS unifying facilities, IT & safety operations | Jun 2026 - Sep 2026

- Led the 0→1 design of the Mapping feature (iOS & Android) as sole designer for real-time asset and work order tracking, shipped in 8 weeks: vibe coding 50+ responsive screens with Figma Make and Claude Code, reducing engineering build time by 67%.
- Redesigned an AI-powered Wiki feature for GED-level frontline staff, resolving 19 UX gaps across 4 core flows with AI tagging and summaries, duplicate detection, and an inline review workflow to minimize the learning curve and prepare content for LLM-driven work order responses.
- Joined at ~5 people, partnering directly with the CEO and web & mobile engineers across the full product cycle from ideation to handoff: rapidly prototyping UX concepts with vibe coding, driving design reviews, and iterating on stakeholder feedback.

City University of Hong Kong (KnowVis Lab) | UX Researcher Intern

AI-powered Learning Systems | Jun 2025 – Dec 2025

- Designed and developed end-to-end UI/UX for 5 interaction modes in AI-assisted reading, iterating through 10+ rounds of prototyping and evaluating how varying AI engagement levels affect users' reading behavior.
- Conducted mixed-methods usability studies (n=30) combining eye tracking data, cognitive load surveys, and interviews, uncovering 2 distinct user behavior patterns that directly informed design decisions on adaptive AI scaffolding.
- Synthesized behavioral and qualitative findings into actionable design recommendations and co-authored a research paper on human-AI interaction design under review at IJAIED.

NetEase Games | UX/Product Designer Intern

120+ minigames, 15-language global Steam release | Jun 2024 - Sep 2024

- Built a component-level design system 0-to-1 for social networking feature "Friend Star Net" as sole UX designer across 100,000+ avatar customization items and social layers, driving a 21% increase in player engagement after global ship.
- Supported end-to-end design for the multiplayer PvP lobby and UGC level editor flows across user flows, wireframes, and high-fidelity mockups in Figma and Unity, collaborating closely with cross-functional partners including PMs, prototype engineers, and GUI artists.
- Independently redesigned 25+ interfaces applying WCAG accessibility standards to achieve pixel-perfect visual consistency across a 15-language global release.

PROJECT EXPERIENCE

Colleague.AI | UX Researcher Intern

AI-Powered K-12 Assessment Platform | Jan 2026 – Mar 2026

- Led a team of 4 to design and execute 6 task-based usability studies (think-aloud, SEQ, critical incident technique) with K-12 educators (n=6) to evaluate AI-powered assessment workflows.
- Synthesized behavioral and qualitative findings into wireframes and prioritized design recommendations implemented by the Colleague.AI product team.
