EDUCATION

University of Washington Sep 2025 – Jun 2027
M.S. Human Centered Design & Engineering | GPA 3.9/4.0

Tsinghua University Sep 2020 – Jun 2025
B.Eng. Architecture | GPA 3.84/4.00, Top 10%, Tsinghua Overall Scholarship

WORK EXPERIENCE

IDEA Enterprises (Guardian) | UX/Product Designer Intern Jun 2026 – Sep 2026
AI-powered B2B SaaS unifying facilities, IT & safety operations

- Redesigned an AI Wiki for both on-site technicians and an AI agent: designed human-in-the-loop AI tagging, mapped authoring fields to agent jobs, and added requester visibility controls; **shipped 10 of 15 audit fixes**.
- Led 0→1 Mapping Design (iOS & Android) as sole designer, placing assets, people, and work orders on campus floor plans; shipped a Figma Make prototype as the engineering spec, **cutting build time ~67%**.
- Drove an AI-native design workflow (Figma Make, Cursor, Claude) at a ~5-person startup: 20+ rounds of clickable prototypes in weekly CEO reviews **cut the design cycle from 12 to 4 weeks**.

City University of Hong Kong (KnowVis Lab) | UX Researcher Intern Jun 2025 – Dec 2025
AI-powered Learning Systems

- Designed and built **5 AI-assisted reading modes** (ICAP framework); found higher AI engagement raised cognitive load without improving learning outcomes.
- Ran a within-subject eye-tracking study (n=30) with NASA-TLX, cognitive-load surveys, and interviews, revealing 2 reading patterns and a trust gap (12 of 30 skeptical of AI).
- Proposed adaptive, source-transparent AI scaffolding; **co-authored a paper under review at IJAIED**.

NetEase Games (Planet Party Time) | UX/Product Designer Intern Jun 2024 – Sep 2024
120+ minigames, 15-language global Steam release

- Built a 0→1 component-level design system for the social feature "Friend Star Net" as sole UX designer, spanning 100,000+ avatar items and social layers; drove a **21% increase in player engagement** after global launch.
- Designed end-to-end flows for the PvP lobby and UGC level editor across **15+ game modes**, from wireframes to hi-fi mockups in Figma and Unity, with PMs, engineers, and GUI artists.
- Independently redesigned 50+ interfaces to WCAG standards for a 15-language global Steam release.

PROJECT EXPERIENCE

Colleague.AI | UX Researcher (Client Project) Jan 2026 – Mar 2026
AI-Powered K–12 Assessment Platform

- Led a team of 4 to design and execute 6 task-based usability studies (think-aloud, SEQ, critical incident technique) with Washington State K–12 educators (n=6) to evaluate AI-powered assessment workflows.
- Synthesized 14 usability issues into 9 prioritized recommendations, **implemented by the Colleague.AI team**.

City of Seattle | UX Designer & Researcher (Hackathon Project) Sep 2025 – Dec 2025
AI-assisted permit application platform · AI prototype + Usability study

- Built **3 versions** of an AI permit platform (no, partial, full AI) in React with a team of 3.
- Ran a between-subjects study (n=42 architects and residents): partial AI raised **usability 34%** and **trust 39%** vs. no AI ($p<.001$), while full AI added no significant gain.

SKILLS

Design: Interaction Design, IA, Design Systems, Prototyping, Visual & Motion Design, Accessibility (WCAG)
AI Product Design: Human-in-the-Loop AI, AI Agent UX, AI Automation, GenAI (Stable Diffusion, Midjourney, Runway)
Research: Heuristic Evaluation, Usability Testing, Think-aloud, Interviews, Eye Tracking, Surveys, A/B Tests
AI Prototyping & Code: Figma Make, Claude Code, Cursor, Lovable, ComfyUI, HTML/CSS, JavaScript, Python, R
Tools: Figma, Framer, Unity, Adobe Suite, Rhino, Blender, Remotion, Playwright, GitHub, Notion
